

Year	AI System	Game	Key Achievement	Developer
2015	AlphaGo	Go	Defeated human world champion Lee Sedol in Go, a highly complex strategy game with more possible moves than atoms in the universe.	DeepMind (Google)
2017	Libratus	Poker	Defeated professional players in Heads-Up, No-Limit Texas Hold'em, excelling in a game of imperfect information and bluffing.	Carnegie Mellon University
2018	AlphaZero	Chess, Go, Shogi	Mastered chess, Go, and shogi through reinforcement learning and self-play, surpassing all previous AI programs (including Stockfish and AlphaGo) without any human data.	DeepMind (Google)
2019	AlphaStar	StarCraft II	Achieved grandmaster-level performance, defeating top professional players in real-time strategy gaming, showcasing AI's ability in resource management and multitasking.	DeepMind (Google)
2019	OpenAI Five	Dota 2	Defeated world champion human teams in the multiplayer online battle arena game Dota 2, mastering the complexity of real-time multiplayer environments.	OpenAI
2019	Pluribus	Poker	First AI to beat multiple professional players in six-player no-limit Texas Hold'em, showcasing its ability to handle multi-agent settings and hidden information.	Facebook AI & CMU
2020	MuZero	Chess, Go, Shogi, Atari Games	Mastered multiple games (both perfect information games like Go and imperfect ones like Atari) without prior knowledge of game rules, using model-based reinforcement learning.	DeepMind (Google)
2021	JueWu-SL	Honor of Kings	Ranked among the top 0.1% of players in the multiplayer online battle arena game, proving AI's capabilities in fast-paced, team-based esports.	Netease AI Lab
2022	DreamerV2	Minecraft, Atari Games	Played Minecraft and various Atari games, highlighting AI's ability to generalize across different types of games using world models.	DeepMind (Google)
2023	DreamerV3	Minecraft, Atari Games	Further improved generalization across diverse games without pre-programmed rules, making it one of the most versatile game-playing AIs.	DeepMind (Google)
