

BFS

(Breadth First Search)

↳ traverse a graph

↳ visit all vertices & edges

Eg:-

Symbols

○ — unvisited vertex

/ — undiscovered edge

⦿ — visited vertex

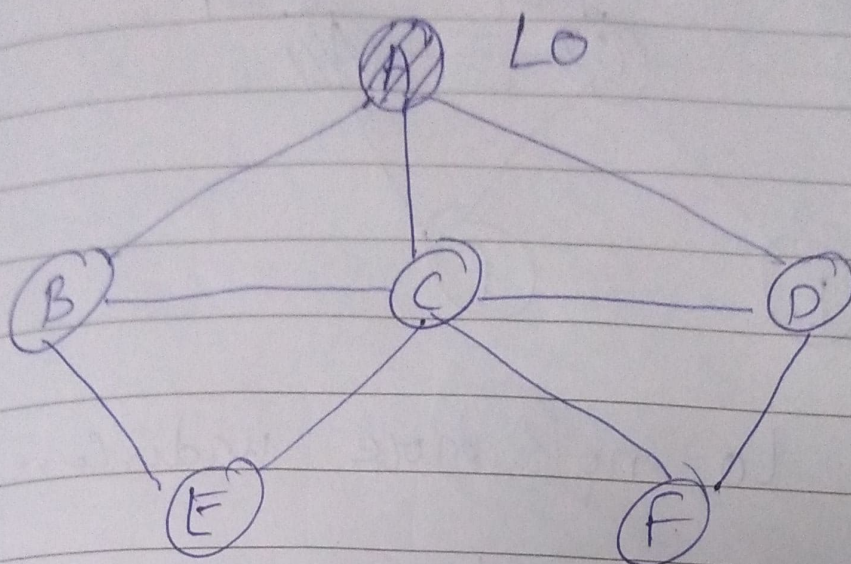

// — discovery edge

~~~~ — cross edge

choose a start vertex (A)

visit A

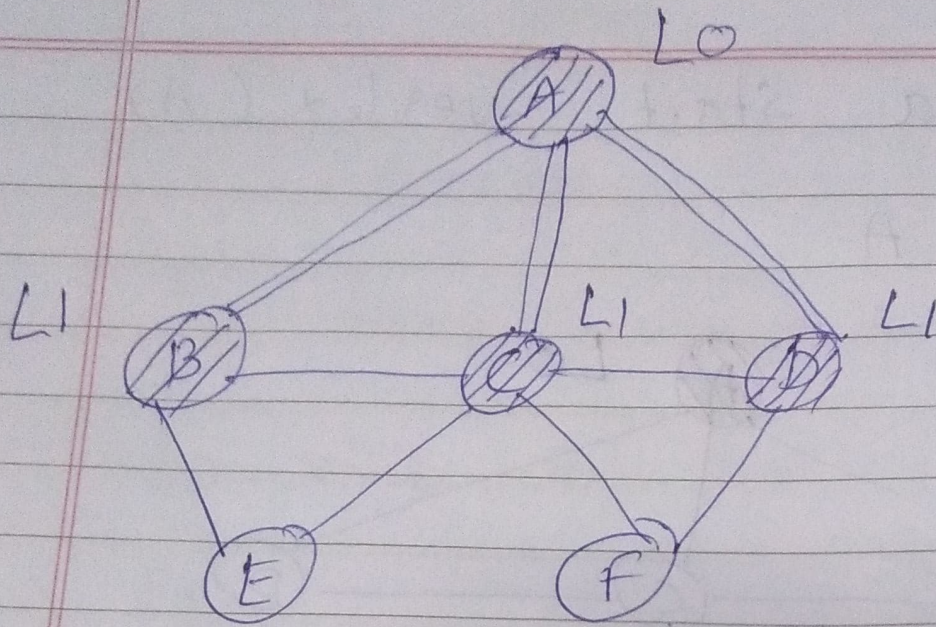

For all  $v \in L_0$ , go to every undiscovered edge.

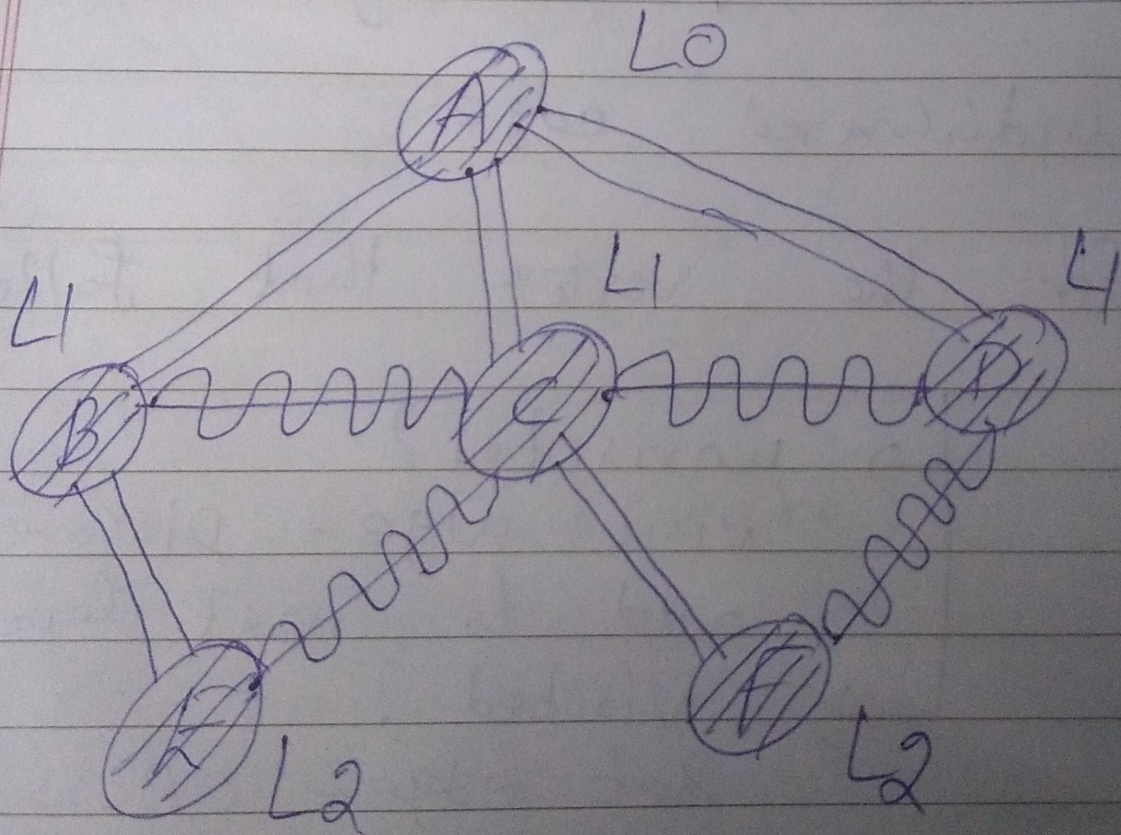

For the vertex that follows,

- unvisited?  
visit edge - discovery  
add to next level
- visited?  
set edge - cross

For  $L_0$ , no more undiscovered edges to traverse, go to  $L_1$

Order: A B C D E F
